Challenges Faced implementing Unnat Bharat Abhiyan activities

Participating Institution

1. Embraced by the charm of rural landscapes, our adopted villages reside in remote areas, presenting a unique set of challenges for the seamless execution of various programs.
2. The dearth of faculty members and constrained financial support poses significant hurdles for us, hindering the full realization of our objectives.
3. Encountering a modest level of student engagement, we aim to enhance participation in these initiatives, recognizing the importance of a broader and more active involvement of our student community.

How to strengthen interventions & initiatives in villages through PIs with (students & faculty members)

1. Launch comprehensive awareness campaigns within our adopted villages, fostering community participation and nurturing a deeper understanding of shared goals.
2. Inspire both faculty and students to delve into pertinent research aligned with the specific needs of the villages, contributing valuable insights that can guide targeted interventions.
3. Elevate the capacity of our faculty for meaningful community engagement through specialized training, empowering students to play pivotal roles in impactful social projects.
4. Implement a systematic evaluation process to consistently gauge the effectiveness of our interventions, incorporating feedback to refine strategies for a more responsive and sustainable impact.
